

MASK RECYCLING PROGRAM

We're collecting tie-back surgical and N95 masks to be reprocessed and disinfected for multiple use.

Place your mask in the bins located at every nurse's station to be sent for reprocessing and disinfecting.

Reprocessed masks will be marked:

- First disinfection: black sharpie marking indication
- Second disinfection: red sharpie marking indicating final use

After using the mask with the red marking, please throw it in the trash.

Masks with broken straps, green masks with nose piece attached and adhesive, and ear loop masks will not be accepted.
